

Amith Raj

Bengaluru, India | +91 8123012310 | amithraj873@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFILE

Cloud and DevOps Engineer with hands-on experience designing and automating cloud infrastructure, building end-to-end CI/CD pipelines, and deploying containerized applications on AWS. Proficient in Kubernetes, Docker, Terraform, Jenkins, and observability tools. Skilled in leveraging Generative AI tools, prompt engineering, workflow automation platforms, and AI-assisted development practices to accelerate software delivery, optimize operations, and improve productivity.

EDUCATION

ATME College of Engineering, Mysore -2022

B.Tech in Computer Science & Engineering | Aggregate: 54%

Senior Secondary (Technical Diploma) & Secondary Education – Aggregate: 62% (XII), 66% (X)

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, VPC, IAM, EKS, CloudWatch, Route 53, ALB, Auto Scaling, CodePipeline)
Infrastructure & Security: Terraform, IAM Policies, SSL/TLS, S3 Bucket Policies, Secrets Management
Containers & CI/CD: Docker, Kubernetes (EKS), Helm, YAML Manifests, Jenkins, AWS CodePipeline, GitHub
Monitoring & Build Tools: Prometheus, Grafana, AWS CloudWatch, ELK Stack, Maven, SonarQube
AI & Automation: ChatGPT, Claude AI, Google Gemini, NotebookLM, Google AI Studio, n8n, Agentic AI
CS Fundamentals & Scripting: Linux/Unix, Bash Scripting, Shell Scripting, YAML, Microservices, High Availability

EXPERIENCE (DevOps Intern | Kotraya Technologies) & (Cloud & DevOps Intern | MicroDegree)

- Built and automated end-to-end CI/CD pipelines using GitHub, Jenkins, Maven, SonarQube, Docker, and AWS EC2, streamlining application build, testing, code quality analysis, containerization, and deployment.
- Automated AWS infrastructure provisioning using Terraform by creating reusable IaC modules for EC2, VPC, IAM, and S3, and implemented infrastructure monitoring with Prometheus and Grafana to improve system reliability and operational visibility.

INTERNSHIP

Kotraya Technologies, Bengaluru – DevOps InternMay 2026 – Present

Worked on CI/CD pipeline automation and AWS infrastructure provisioning using Jenkins, Docker, Terraform, and AWS, improving Deployment speed and reliability.

MicroDegree, Bengaluru – Cloud & DevOps InternJan 2026 – June 2026

Provisioned cloud infrastructure using Terraform with reusable templates and implemented Prometheus & Grafana monitoring.

PROJECTS

AWS Three-Tier Web Application Deployment | AWS EC2, ALB, Auto Scaling, RDS, VPC |

- Designed and deployed a highly available MERN/3-tier web application on AWS using EC2, ALB, Auto Scaling, and RDS with custom VPC.

End-to-End CI/CD Pipeline | GitHub, Jenkins, Docker, SonarQube, Maven, AWS EC2 |

- Built an automated CI/CD pipeline using Jenkins for build, test, code quality analysis, containerized deployment, and pipeline monitoring.

Infrastructure as Code (Terraform Preferred) | Terraform, AWS EC2, VPC, IAM, S3 |

- Automated AWS cloud infrastructure provisioning using modular Terraform scripts with reusable, version-controlled templates.

ACHIEVEMENTS

- Designed & deployed production-ready 3-tier AWS cloud architecture with high availability and automated failover.
- Automated end-to-end CI/CD delivery pipelines reducing manual deployment overhead across multi-tier environments.
- Built automated infrastructure monitoring with Prometheus, Grafana, and ELK Stack for centralized observability.
- Recognized for ranking in Top 5% in AWS & DevOps Certification Program by MicroDegree.

CERTIFICATIONS

MicroDegree – DevOps Engineer Certification

MicroDegree – AWS & DevOps Internship Program

MicroDegree – AWS Solutions Architect 2025

Be10X – AI Tools & Automation Workshop

CO-CURRICULAR ACTIVITIES

- Lead Coordinator in College Tech Fest – Cloud Infrastructure & DevOps Hands-on Workshop.
- Event Coordinator for 10+ college technical events & Open Source Community Meetups.
